Carbon Monoxide Agreement

Carbon monoxide is an odorless, colorless and toxic gas. Because it is impossible to see, taste or smell the toxic fumes, CO can kill you before you are aware it is in your home. At lower levels of exposure, CO causes mild effects that are often mistaken for the flu. These symptoms include headaches, dizziness, disorientation, nausea, and fatigue. The effects of CO exposure can vary greatly from person to person depending on age, overall health and the concentration and length of exposure.

This agreeme	ent is made this	day of	, 20	_, between Greensboro
Homeowner's	s Association and			as
homeowner(s	s) of the property addi	ress		,
St. Louis Parl	k MN 55426.
